

DESIGN DOSE

Meet Your Mentor

Surya Pratap Kahar
Founder-Techdose Ex-Google

- Distributed Systems
- High Level Design
- In-depth architecture discussions
- Detailed Application designing
- Real-life Case Studies
- Design Tradeoffs

Reviteja Bejgum
amazon (SDE - 3, L6)

- OOP Concepts
- Machine Coding
- Low Level Design
- Design Patterns
- Watch at your own pace
- SDE-3 Amazon

High Level Design (HLD) Topics

Mentor: Surya Pratap Kahar | Live Sessions

Building Blocks

- Understanding distributed systems
- Essential Theorems and Models
- Storage Retrieval
- Replication techniques
- Consistency Models
- Linearizability
- Replication wrt Consistency
- Achieving Fault Tolerance at Scale
- Physical Clocks
- Logical Clocks
- Ordering of events and various delivery guarantees
- Snapshot strategies and Disaster recovery
- Atomicity in transactions
- Consensus Algorithms
- Designing Reliable, Replicated, And Fault-Tolerant Systems
- Batch Processing
- Stream Processing
- Distributed Rate Limiter
- Read heavy architectures with application
- Write heavy systems with high availability
- Tunable large-scale architecture

+MUCH MORE

Application Designs

- Video on Demand (Netflix)
- P2P & Hybrid architectures
- Live-streaming at scale (Hotstar,ESPN)
- Unique ID: Builder Design & Strategies
- Distributed Large-Scale Web Crawler: With design use-cases
- Maps & Proximity Service: for Google Maps, Airbnb, Uber, Zomato etc
- Collaborative Editing System: Google Docs
- Distributed Cache Architecture: Memcached
- Distributed Social Graph Data Store: FB TAO
- Search Engine Design: Google Search
- Kafka: The Backbone of Real-Time Systems
- Event Driven Architectures
- Wait free coordination with Zookeeper
- Payment Systems: Architecting Transactions at Scale
- Redis: Designing High-Performance In-Memory Systems
- Zanzibar: Designing Google's Global-Scale Authorization System
- Cassandra: Designing Distributed NoSQL Databases at Scale
- GFS: Designing Distributed File Systems at Google Scale
- Amazon S3: Designing Scalable Object Storage Systems
- Spanner: How Google Achieves Strong Consistency at Scale
- Designing Vector Databases: High-Level Design for AI & Search

+MUCH MORE

Low Level Design (LLD) Topics

Mentor: Raviteja Bejgum | Pre-Recorded Sessions

Basics

- Class
- Object
- Fields
- Methods

OOPs Pillars

- Abstraction
- Encapsulation
- Inheritance
- Polymorphism

SOLID Principles & DRY Principles

Object relations

- Is A & Has A relations (Aggregation, Association, Composition)
- UML Arrows
- Cardinality b/w objects.
- Examples of Object relations

Design patterns

Creational Patterns

- Singleton
- Factory
- Builder
- Prototype (Optional)

Behavioural Patterns

- Command
- Strategy
- Observer

Structural Patterns

- Decorator
- Facade & Proxy
- Adaptor (Optional)

Contracts, Services & Repositories

Code structuring

- MVC code structuring
- Extracting contracts & APIs.
- Developing Service layer following principles
- Repository layer
- Sequence Diagram examples
- Examples

Machine coding problems

- Solving problem end to end starting from requirement gathering to OOP machine coding.

Testimonials

Ujjval Sharma | amazon

Techdose's System Design Live Training completely transformed my approach to design problems! Despite reading countless blogs and watching hours of videos, I lacked confidence until I took Surya's mock interview. That eye-opening session revealed my gaps and convinced me to join the program.
For anyone stuck in tutorial purgatory like I was - this program is the bridge between theory and real design mastery. Thank you, Surya and Techdose, for creating such transformative learning!

Anandita | Meta

Joining TechDose's DSA and System Design LIVE program was the turning point in my career journey. As someone dreaming of MAANG companies, I needed proper actionable guidance from someone who has already guided many others like me.
The curriculum was perfectly tailored too, cutting out irrelevant topics and focusing only on what mattered for interviews. Every problem set, whether medium or hard, was carefully chosen to build the exact skills needed.

Alekhya | amazon

I had joined Techdose to prepare for switching to a better opportunity when I was working for Cradlepoint. Understanding the hard topics were made easy, thanks to the amazing way of explanation. I always had fear of difficult topics and after the LIVE sessions I felt very confident. All my doubts were addressed LIVE and during the assignment discussion sessions. I had taken some time to prepare for Amazon Ireland and at the end of the course, I was lucky enough to get a full-time offer from Amazon as SDE-2.

Sumit Ranjan | Bloomberg

From day one, I was impressed by the session quality, the deep dives into each concept, and the insightful breakdown of problems. Their topic–problem mapping taught me a repeatable technique to tackle unfamiliar questions, turning my fear of the unknown into confidence. Thanks to Techdose's targeted curriculum and real-time support, I walked into Bloomberg's interviews fully prepared—and secured the offer. I'm grateful for their dedication and highly recommend their LIVE program.

SPECIAL OFFER

For India

Price

~~₹30,000/~~

28K INR

Applicable GST: 18%

Payments are Non-Refunadable

Early bird offer*

₹1,000/- OFF
